Allowable Subject Matter

No particular reference provides relevant, objective evidence to make the whole structure and interaction of the claimed method obvious by changing the closest prior art of record (Schuetze, Foltz, Manning et al.) to include the generation as claimed of rows and columns of the common matrix as products based on co-occurrence matrices for documents, particularly with document segments (from the documents) to generate the co-occurrence matrices.

- b. Independent claim 2, at least sets forth allowable material similar to claim 1.
- c. Independent claim 3, at least sets forth allowable material similar to claim 1.
- d. Independent claim 4, at least sets forth allowable material similar to claim 1.
